Works of Nature .- In a state of health the intestinal canal may be compared to a river whose waters flow over the adjoining land, thro' the channels nature or art has made, and improve their qualities; so long as it runs on oothly the channels are kept pure and healthy; if the course of the river is stopped, then the water in the canals is no longer pure; but soon becomes stagnant. There is but one law of circulation in nature. When there is a superabundance of humorial fluid in the intestinal tubes, and costiveness takes place, it flows black into the blood vessels, and intiltrates itself into the circulation. To establish the free course of the river, we must remove the obstructions which stop its free course, and those of its tributary streams. With the body, follow the same natural principle-remove the obstructions from the bowels with BRANDRETH'S PILLS, which never injure, but are always effectual for the perfect cleansing of the system from foulness or disease. Remember; never suffer a drop of blood to be taken from you. Evacuate the humors as often and as long as they are deranged, or as long as you are sick See that B. BRANDRETH is in white letters

REASONS WHY AMERICAN WATCH

> Made at Waltham, Mass. IS THE BEST.

IT IS MADE ON THE BEST PRINCIPLE. Its frame is composed of SOLID PLATES. No jar can interfere with the harmony of its working and no sudden shock can damage its machinery. Every piece is made and finished by machiner (itself famous for its novelty, as well as for its effectiveness) and is therefore properly made. The watch is what all mechanism should be-ACCU-RATE, SIMPLE, STRONG AND ECONOMI-CAL. Except some high grades, too costly for general use, foreign watches are chiefly made by women and boys. Such watches are composed of several hundred pieces, screwed and rivited together, and require constant repairs to keep them in any kind of order. All persons who have carried "ancres," "lepines" and "English Patent Levers," are perfectly well aware of the truth of

At the beginning of our enterprise, more than ten years ago, it was our first object to make a thoroughly good low-priced watch for the million, to take the place of these foreign impositionsthe refuse of foreign factories-which were entirely unsaleable at home and perfectly worthless everywhere.

How well we have accomplished this may be understood from the fact, that after so many years of public trial, we now make MORE THAN HALF OF ALL THE WATCHES SOLD IN THE UNITED STATES, and that no others ave ever given such universal satisfaction. While his department of our business is continued with icreased facilities for perfect work, we are at resent engaged in the manufacture of watches f the very HIGHEST GRADE KNOWN TO HRONOMETRY, unequalled by anything hithest workmen in our service. New machines | 1 ouse has had a very large and fucrative nd appliances have been constructed, which age, and with proper management it will no doubt be continued. dexactness. The choicest and most approved aterials only are used and we challenge comaris m between this grade of our work and the nest imported chronometers. We do not preand to sell our watches for less money than foreign atches, but we do assert without fear of contra iction that for the same money our product is comparably superior. All our watches, of whatver grade, are fully warranted and his warrantee good at all times against us or our agents in all arts of the world.
